

Kentucky Center for Instructional Discipline Overview

Positive Behavior Support

Positive behavior support (PBS) is the application of behavior analysis to achieve socially important behavior change. It is not a new intervention package, nor a new theory of behavior. Instead, it is an application of a behaviorally-based systems approach to enhance the capacity of schools, families, and communities to design effective environments that improve the fit or link between research-validated practices and the environments in which teaching and learning occurs. Attention is focused on creating and sustaining school environments that improve lifestyle results (personal, health, social, family, work, recreation, etc.) for all children and youth by making problem behavior less effective, efficient, and relevant, and desired behavior more functional.

Continuum of School-wide Instructional and Behavior Support

Commitments for Participation in KCID Training

These commitments were developed from experiences of schools involved with 4 projects over 8 years in Kentucky and even more extensive understanding from project nationwide.

- Team Based Planning and Problem Solving
- Instructional Approach to Behavior and Classroom Management
- Active Administrator Support and Participation
- Long Term Action Planning
